Connect Your Shopify Store to CellarsMarket

Part 1: Create the CellarsMarket app in Shopify

1. Sign in to Shopify using the store owner account.
2. Click your profile/account menu in the corner.
3. Select Dev Dashboard.

4. Select Create app

5. In Create an app, enter the following details:

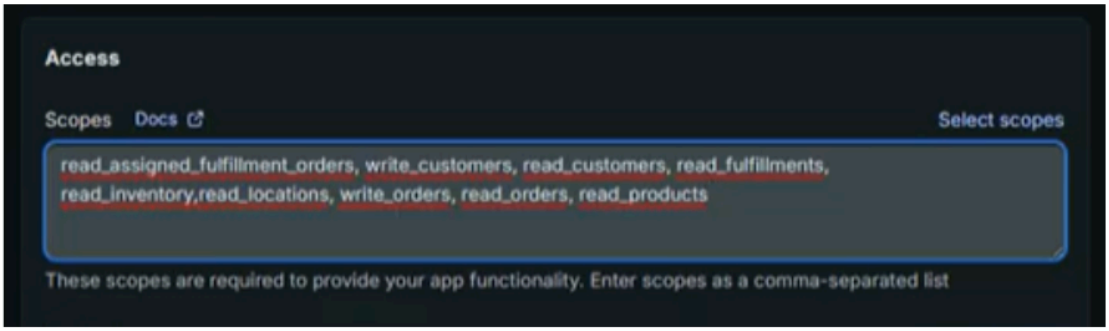

A. The app name: **CellarsMarket**

B. Add **App URL**: copy and paste the default URL **https://shopify.dev/apps/default-app-home**

C. **Uncheck** the **Embed app** in Shopify admin

D. **API access**: In the Scopes box, copy and paste these scopes below (**in bold**) into the API access scopes field

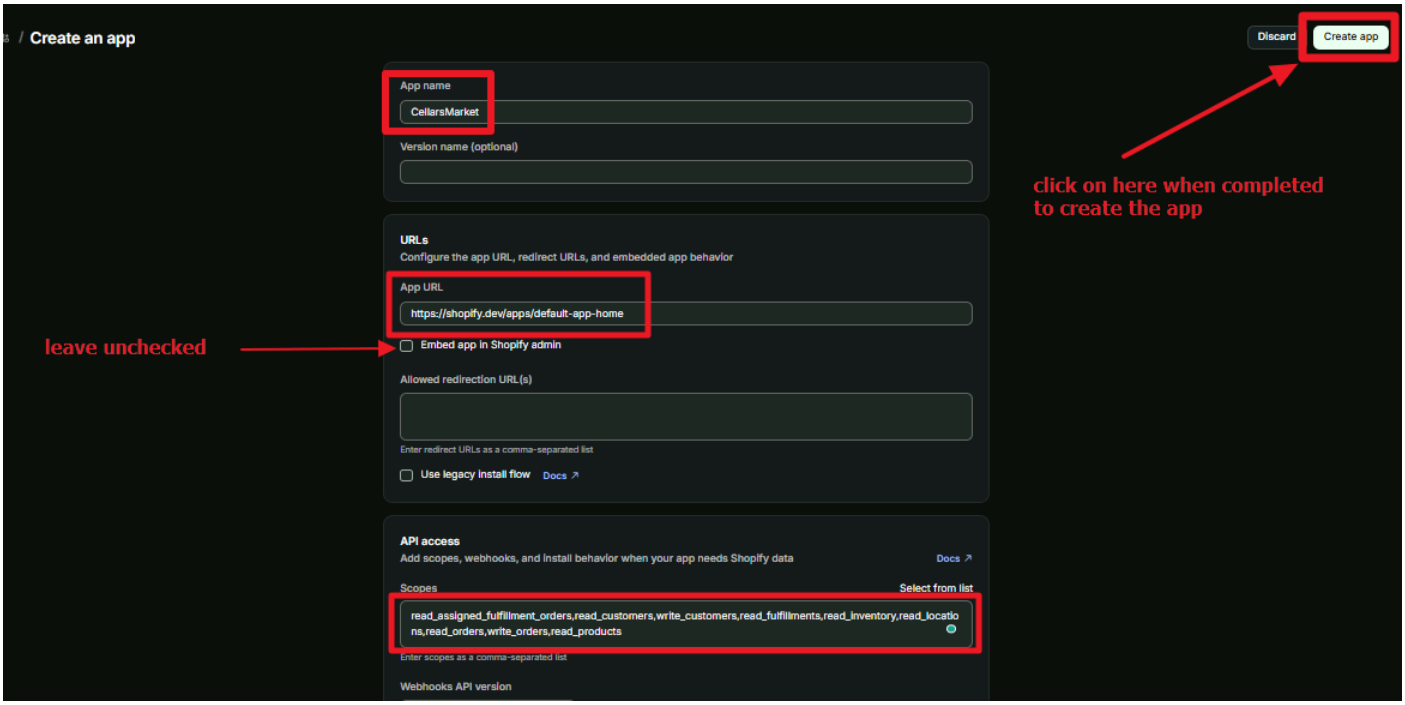

read_assigned_fulfillment_orders,read_customers,write_customers,read_fulfillments, read_inventory,read_locations,read_orders,write_orders,read_products

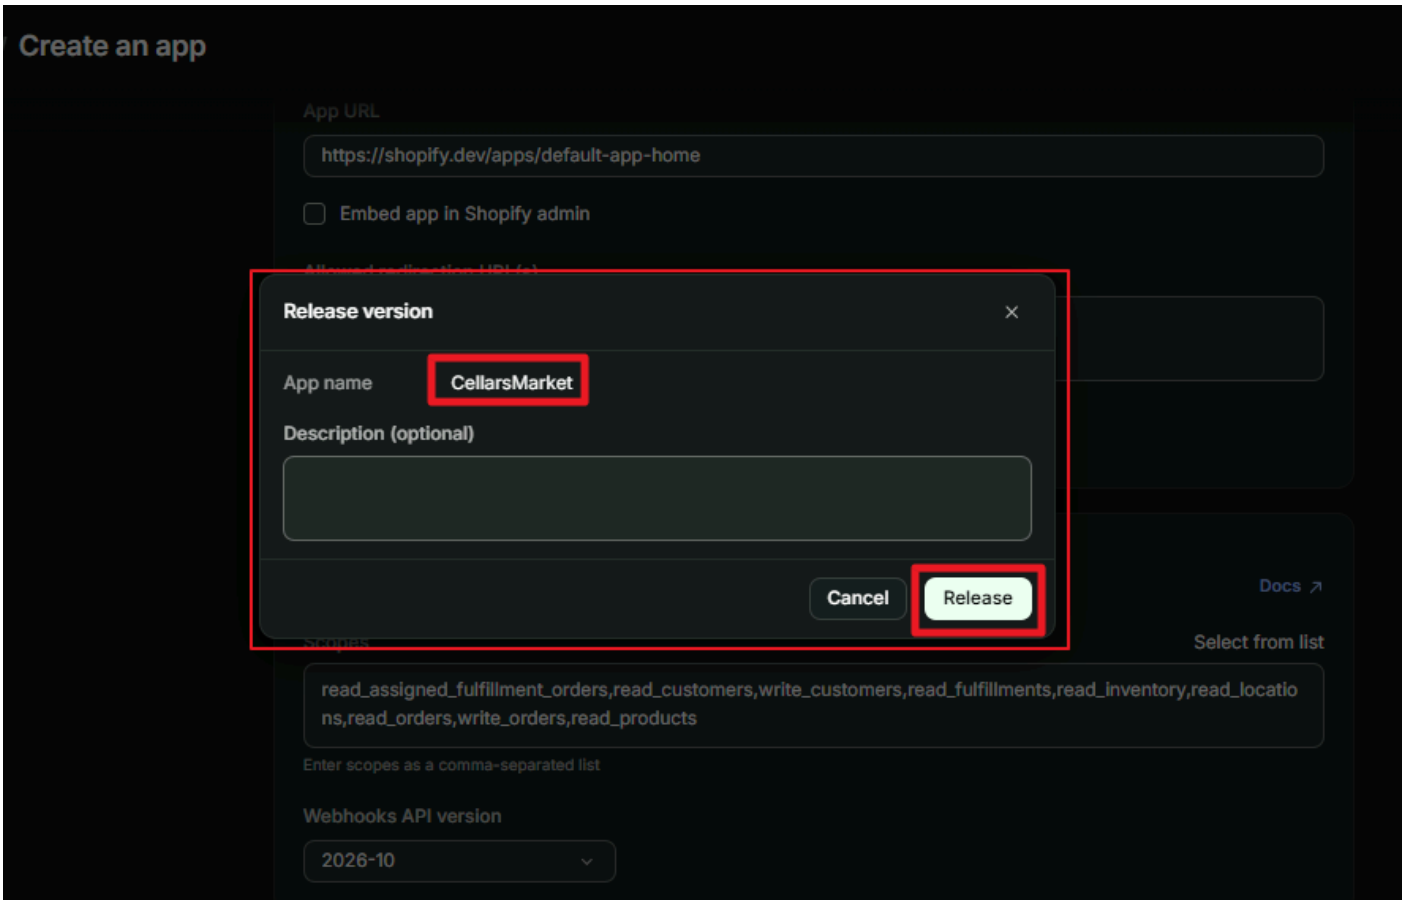

Important: Check that all nine scopes are included.

E. **Webhooks API version**: Select the Webhook API version as **2026-10** from the dropdown

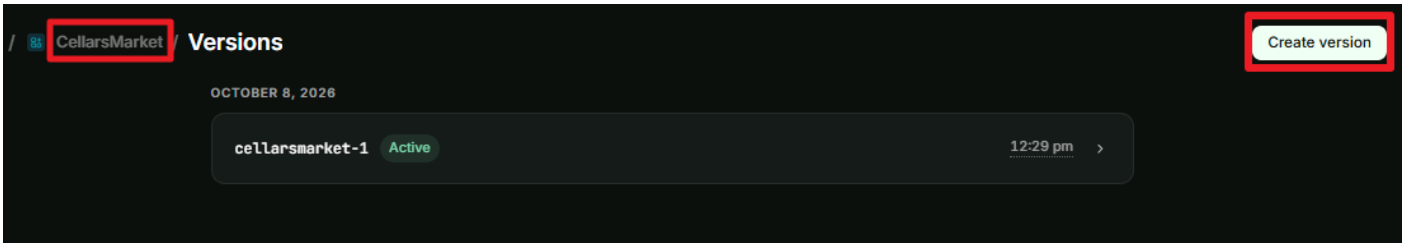

6. Select **Create app** at the top of the page and then confirm by clicking on the **Release** button.

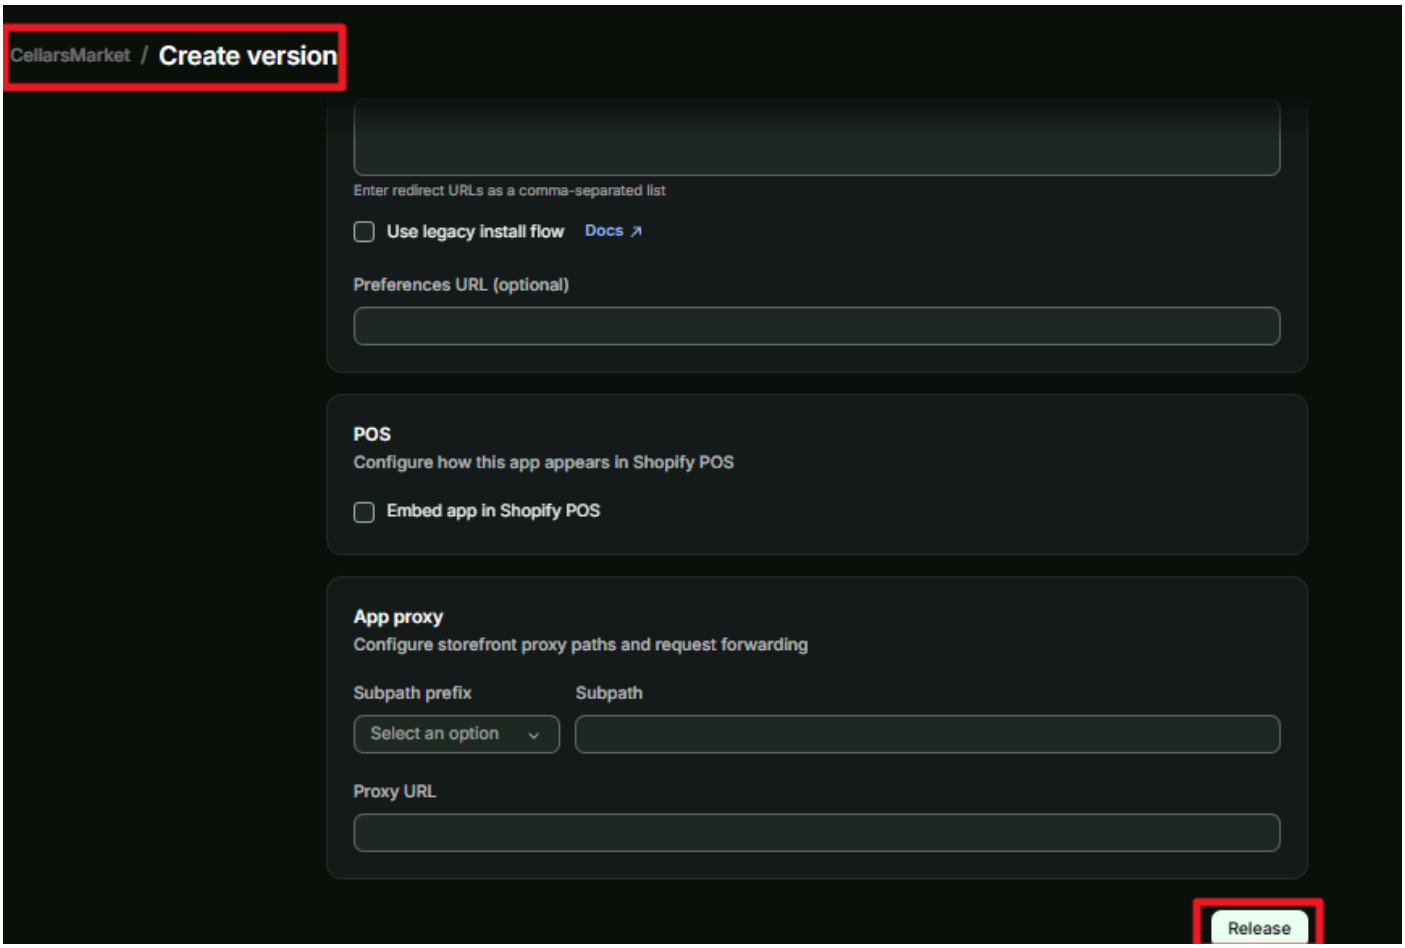

Part 2: Install the app

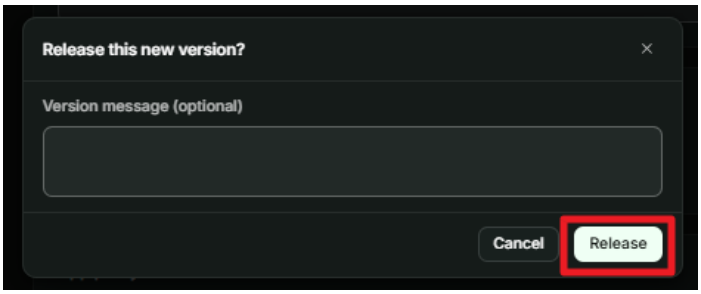

7. You will be automatically returned to the Shopify Dev Versions Dashboard. Click on the **Create Version** app you made.

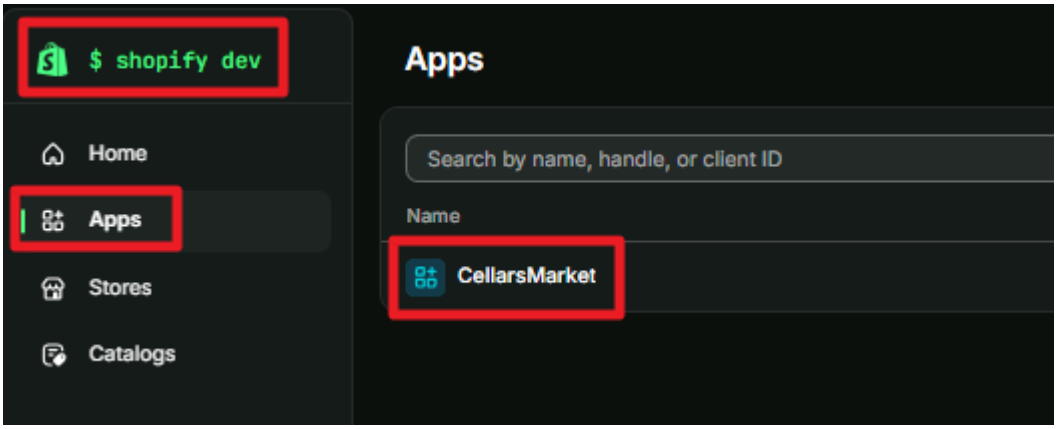

8. Then scroll to bottom of the page and click on the **Release** button

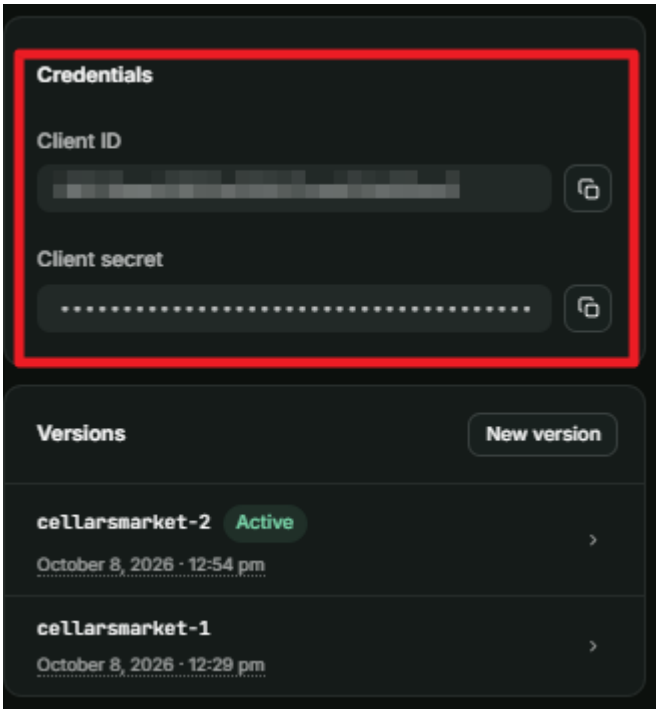

9. Confirm the pop-up again by clicking on the **Release** button.

10. Then go back to the **shopify dev** dashboard and click on **Apps** then CellarsMarket

11. Copy the **Client ID** and **Client Secret**, and share these with Cellars Market via email.

Part 3: Send your connection details

Email the following three details to office@cellarsmarket.co

- Client ID
- Client Secret
- Your permanent Shopify store URL, ending in .myshopify.com

> Find your .myshopify.com address
> In Shopify admin, open Settings → Domains. Use the permanent Shopify address shown there, such as your-store.myshopify.com. Do not use your public custom domain.
